

ASHISH RANA

SENIOR UNITY DEVELOPER

Bengaluru, Karnataka, India | 8892619001 | ashish100rana123@gmail.com

PROFESSIONAL SUMMARY

Senior Unity Developer with 5+ years of professional experience delivering 15–20+ interactive applications, games, XR/AR experiences, educational solutions, and WebGL projects. Strong hands-on expertise in C#, Unity, 3D mathematics, OOP, SOLID principles, UI/UX, API integration, debugging, and performance optimization. Experienced in leading projects end-to-end, technical architecture, client communication, team mentoring, release management, VR/XR, AR, AI/ML model integration, ONNX Runtime, pose/hand tracking, REST/WebSocket/GraphQL APIs, Firebase, and third-party SDKs.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, C++, C, Python

Unity & Development: Unity, PlayCanvas, **3D Mathematics**, **OOP**, **SOLID Principles**, UI/UX, Physics, Raycasting, Coroutines, Async Programming, ScriptableObjects

XR / AR: Meta Quest 2/3, HoloLens, OpenXR, SteamVR, Mobile AR, AR Foundation, WebAR

AI / Computer Vision: ONNX, ONNX Runtime, ML Model Integration, Pose Tracking, Hand Tracking

APIs & Backend: REST APIs, WebSockets, GraphQL, JSON, Firebase, Third-Party SDK Integration

Optimization: CPU/GPU, Draw Calls, Batching, Memory, FPS, Mobile/VR, Unity Profiler, Object Pooling, Build Size

Platforms & Release: Android, iOS, WebGL, HoloLens, Meta Quest, Windows, Xcode, Google Play Console, App Store Connect, Git, GitHub

PROFESSIONAL EXPERIENCE

Devden Creative Solutions — Senior Unity Developer

Bengaluru, India | 5+ years

- Delivered 15–20+ Unity-based projects across games, XR/VR, AR, training and simulation, educational applications, interactive experiences, and WebGL.
- Led projects while remaining hands-on with technical implementation, architecture, system design, debugging, optimization, and release processes.
- Designed project architecture and made technical decisions involving code structure, SDK/plugin selection, system communication, and platform-specific implementation.
- Led a 2–4 member development team, providing technical guidance and mentoring junior developers.
- Worked directly with clients to gather requirements, explain technical limitations and solutions, demonstrate builds/prototypes, incorporate feedback, and manage revisions.
- Integrated REST APIs, WebSockets, GraphQL, Firebase, and third-party SDKs into Unity applications.
- Integrated ML models using ONNX/ONNX Runtime, including pose and hand-tracking workflows.
- Developed and optimized applications for Meta Quest, HoloLens, Android, iOS, WebGL, and Windows.
- Performed CPU/GPU, memory, draw-call, batching, FPS, and build-size optimization, particularly for mobile and VR applications.
- Managed Android APK/AAB, iOS, WebGL, and platform-specific builds; worked with Xcode, Google Play Console, and App Store Connect.
- Diagnosed and resolved major technical issues and took ownership of projects from development through release.

SELECTED PROJECTS

Beautyque — Multiplayer Multi-platform Application

Unity | VR | iOS | Android | WebGL

- Led development of a multiplayer, multiplatform application targeting WebGL, Android, iOS, and Oculus Quest 2+.
- Managed a 2–4 member team while remaining responsible for major technical implementation and delivery.
- Integrated Shopify APIs for product information, cart management, and user-data retrieval.
- Integrated Ready Player Me for customizable avatars and immersive virtual experiences.
- Designed and implemented UI/UX across platforms.
- Integrated Firebase SDK for tracking and storing additional user and cart information.

Mercedes-Benz — HoloLens XR Application

Unity | HoloLens | XR

- Developed an XR application using a 3D vehicle model superimposed onto a real vehicle.
- Used HoloLens camera-based marker scanning to align the digital model with the physical vehicle for post-crash study.

VR Drum — VR Music Learning Application

Unity | Oculus Quest | Android | VR

- Developed a lesson-based VR application for learning drums and understanding musical notes from the basics.
- Implemented interactive VR learning and gameplay experiences for Oculus Quest.

Simply Abacus — Educational Application

Unity | Android | iOS

- Developed an interactive application for progressively learning abacus concepts.
- Implemented coloring, maze, Sudoku, multi-user functionality, and statistics management.

Eduzo School Lessons — Interactive Educational Modules

Unity | 3D

- Developed interactive 3D modules covering light reflection, mirrors, lenses, and refraction.
- Developed an interactive dentistry module for learning about articulators and their usage.

Squid Game — Multiplayer Motion-Based Game

Unity | Windows

- Developed a multiplayer game controlled by human body movements detected through a depth-sensor camera.
- Implemented gameplay involving human players and bots competing to reach the finish line.

Mall Navigation — Interactive Kiosk

Unity | Windows

- Developed a mall kiosk application that calculates and displays the shortest path to a selected destination.

Water Heater Maintenance — Training & Testing

Unity | WebGL

- Developed interactive training and testing modules for step-by-step maintenance and repair of three types of water heaters.

KDD Game — Promotional Web Game

PlayCanvas | WebGL

- Developed a fruit-and-juice-box cutting game for promoting KDD juices and milkshakes.

Don-Simon Game — Promotional Web Game

PlayCanvas | WebGL

- Developed promotional mini-games with a points system allowing customers to redeem coupon codes.

Intel Startup Program

Unity | WebGL

- Developed an interactive WebGL experience supporting an innovative startup initiative.

ADDITIONAL PROJECT

AnimeVerse — Personal Project

PlayCanvas | WebAR

- Developed a WebAR experience enabling users to view and interact with 3D anime characters in real-world environments.

EDUCATION

B.Tech — Computer Science

MVJ College of Engineering | 2020

ADDITIONAL INFORMATION

Target Role: Senior Unity Developer

Preferred Location: Bengaluru, Karnataka

Notice Period: 1 Month
